

SCOTT

The Scott Group story first began in 1969, but in many ways, it begins anew with every project we do. Using the world's finest natural fibers, we combine our creativity and meticulous craftsmanship to create one-of-a-kind rugs and carpets. Because our entire process takes place under one roof, our designers can serve as ambassadors of your ideas, monitoring every step to make sure the end product meets or exceeds your expectations. Along the way, our team of tufters, finishers, and customer service representatives work diligently to make sure each carpet is nothing short of perfection. At Scott Group Custom Carpets, we never tire of transforming your ideas into luxury carpets like no others on earth.

Solstice Collection Volume No. 19

Inspired Design

Our Solstice Collection takes inspiration from Scandinavian modern design created during the mid-century.

Characterized by saturated color and simple design, this design movement emphasized functionality and craftsmanship. The concept of “beautiful things that make your life better” was embraced and highly regarded.

These designers and artists favored a more comfortable and colorful aesthetic that fulfilled the need of function, but encouraged mixing patterns and styles to contrast the stark minimal looks of typical modern design.

We have drawn from these ideas to create a collection of vibrant and playful patterns, complemented with simple yet elegant textures.
